*Get a gorgeous bronzed glow without the damage that can be caused to your skin by over exposure to the sun or UV tanning beds. FakeBake spray tan is a tanning treatment which is applied to the skin by spraying the body with a fine mist. Our FakeBake exclusive formulas "Original" and "Instant Dark" contain high percentages of two tanning ingredients, DHA and Erythrulose, which bonds with your skin's natural pigment. This technology transports these active ingredients to deeper layers of your skin. This revolutionary treatment offers a safe, sunless tan in 15 minutes. You will have an immediate color which will graduate into a rich golden all over tan that will last for approximately 5 – 7 days, dependant on your preparation and aftercare routines. Whether you incorporate a spray tan as part of your weekly beauty regime or just one special occasion, there's no safer way to look gorgeously tanned!*
